

DENZIL RODRIGUES

Full Stack Developer

Karnataka, India

[\(+91\) 9113203669](tel:+919113203669) | denzil.rdz@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Lead Software Engineer with 6+ years of full-stack and AI engineering experience across healthcare tech, cloud platforms, and enterprise SaaS. At Cloudscale, leading front-end architecture, micro-frontend delivery, and intelligent agent development using LangChain, LangGraph, and RedisVL. At Biofourmis, built and scaled real-time IoT streaming systems across AWS and Azure. Proven track record designing maintainable codebases, driving CI/CD best practices, and aligning engineering delivery with product goals. Comfortable owning end-to-end solutions from React interfaces to FastAPI backends with a sharp focus on scalability and developer experience.

EXPERIENCE

LEAD SOFTWARE ENGINEER

Cloudscale | Remote

FEBRUARY 2025 – PRESENT

- Led front-end architecture design and development using React, focused on scalability and modularity, while driving AI-powered application development including intelligent agents and RAG pipelines using LangChain libs.
- Architected and implemented a micro-frontend infrastructure supporting independently developed and deployed features across multiple teams, alongside a universal configurable multi-provider agent framework enabling seamless LLM provider switching via a unified interface with Redis Vector Library (RedisVL) for semantic caching and reduced latency.
- Owned end-to-end delivery of a client-facing dashboard with full-stack responsibility across a React frontend and FastAPI backend, covering architecture, feature development, and API design, backed by a robust pytest framework ensuring reliability and maintainability of backend services.
- Built a base application providing shared functionality including theming, state management, and utility components, while collaborating with cross-functional teams to align development practices, enforce design standards, and streamline integration workflows across frontend and AI agent development initiatives.

SOFTWARE ENGINEER → SENIOR SOFTWARE ENGINEER

Biofourmis | Bangalore, India

(JULY 2021 – MARCH 2024) | (APRIL 2024 – JANUARY 2025)

- Architected and maintained scalable systems using Flask, Node.js, React.js, Express.js, and MongoDB
- Built and maintained data migration platforms and real-time APIs with Python, Flask, Express.js, and Socket.IO
- Streamed IoT device data to AWS IoT Core, Azure IoT Hub, and Apache Kafka
- Deployed services on EC2 and EKS via Jenkins; collaborated with product and stakeholders on requirements and timelines

FULL STACK DEVELOPER

Freelance | Remote

SEPTEMBER 2020 – JUNE 2021

- Create security and data protection rules in GCP Firestore
- Build features and applications with a mobile responsive design and using GCP cloud functions as BaaS

EDUCATION

- **BACHELOR OF COMPUTER APPLICATION (2020)**
St. Aloysius College, Autonomous (Affiliated to Mangalore University)
 - **AWS CLOUD QUEST: CLOUD PRACTITIONER**
Amazon Web Services Training and Certification
-

-
- **AWS FUNDAMENTALS: GOING CLOUD NATIVE | GOOGLE CLOUD PLATFORM FUNDAMENTALS: CORE INFRASTRUCTURE**
Coursera
 - **DIPLOMA IN HARDWARE AND NETWORKING**
Ruby Group of Computers (National Board of Computer Education)
 - **CLASS XII**
St. Aloysius PU College (Department of pre-university education, Karnataka)
-

SKILLS

LANGUAGES: C, C++, Java, Python, HTML, php, Java-Script, Type-Script (Nodejs, Bun).

IDES: Net-Beans, Visual Studio Code, Pycharm, Android Studio, Antigravity

FRAMEWORKS: Django, Flask, Express, React (Webpack, Vite), Tailwind, FastAPI, Next.js

DATABASES: MySQL, Apache Derby, MongoDB, Firebase Realtime DB, PostgreSQL, Redis (Cache/VL).

CLOUD PLATFORMS: Amazon Web Services (AWS), Google Cloud Platform (GCP), Firebase, Microsoft Azure Cloud

VERSION CONTROL: Git (Github, Bitbucket, Gitlab) **CI/CD:** Jenkins, Github Actions, Bitbucket Pipeline

TESTING: Pytest, Selenium, Appium, Playwright

AI/ML: LangChain, LangGraph, LangSmith, Model Context Protocol (MCP), Ollama, Hugging face

TOOLS: Android Debug Bridge, Kubernetes, Docker, Celery, Swagger, Postman, Apache Kafka, Grafana, ESLint, Husky, Prettier, Black, Flake8, Prometheus, JIRA, Material UI, Cloudflare

PERSONAL PROJECTS

- **Images Compare:** <https://pypi.org/project/images-compare/>
An open-source Python package allows for image comparison between two provided images using a specified threshold.
 - **EventX:**
EVENTX is designed Proudly for Event Rental Businesses. This App encompasses spectrum of advanced functionalities. This is developed using React and firebase Realtime database.
 - **Cart:** <https://github.com/denzilrdz/My-Cart>
This is not just another e-commerce website but is focused on the privacy of the user. The user is assigned a group where the sub-interest changes every three days and the main-interest every week. This project is developed using Django framework.
 - **Apartment Management System:** <https://github.com/denzilrdz/Apartment-Management-System>
The system is developed with Java Server Page. This system deals with the day-to-day activities of the apartment like bill payments, hall booking, gym membership, visitor's entry, guest visit for vacant apartments and service request.
-

EXTRA CURRICULAR

- Languages known are Konkani (Mother tongue), English, Hindi, Kannada and Urdu.
 - A member of AICUF since 2015 and was the secretary of college unit. I have actively participated in hunger-drives, medical camps, state councils and state camps organized by AICUF.
 - I like to listen to music, sing and play guitar. I am familiar with tools such as Figma, Adobe XD, Adobe Premiere, Adobe Photoshop, Adobe Audition, Snapseed, FL Studio and create short videos.
-
